

## Curriculum Information and Progress Grids

Under each tab you will find more detailed information about each curriculum area.

**Our Values** - for each subject area we have selected some of our core Christian values that complement the subject area. We believe that through our teaching of the subject we can exemplify the meaning of that particular value and how it applies to our school. For example, in Geography we better understand the value of 'friendship' by learning about different environments and places around the world where our friends (of the future?) might live or work.

**Subject Statements** - for each phase of the learning journey through school we have summarised how learning and teaching work in that subject.

**The National Curriculum** - Purpose of Study, Subject Aims and Subject Content; the Government's statutory requirements for teaching in each subject.

**Project Progression Information** - an overview of the topics, projects and areas studied across the school from EYFS to Year 6.

**Knowledge and Skills Progression Information** – an overview of the key knowledge, skills and concepts taught in each year group as children progress through the school on their learning journey.

**Vocabulary development** - an overview of the key vocabulary that is taught and revisited in each year group as children progress through the school on their learning journey.

Naturally, this whole school guidance is used by teachers and subject leaders to plan units of learning in greater amounts of detail that become living lessons in the classroom. These progression grids are reviewed and updated by subject leaders and the teaching team on a routine basis.
