Underneath is a label 'Password' and a yellow text input field with masked characters '.....'. A 'Forgotten Password?' link is below the password field. A yellow 'Sign In >' button is at the bottom right.

3. You will arrive at the “Welcome (YOUR NAME)” screen. Click on “Web Game” button.

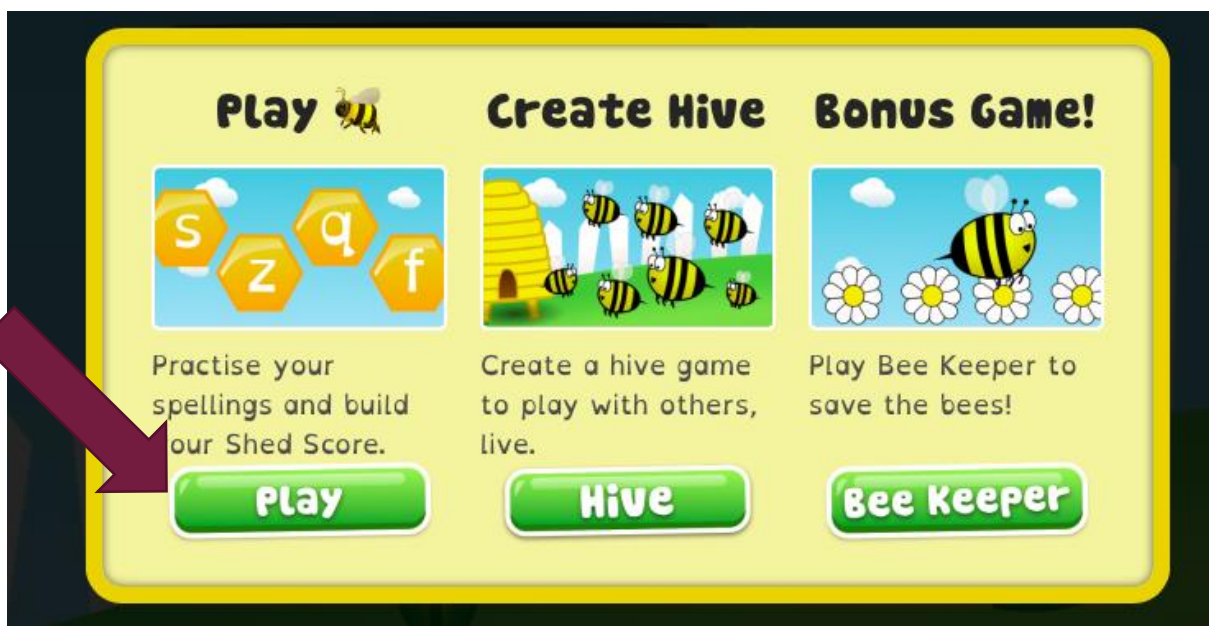

4. At the next screen, select “Play”.

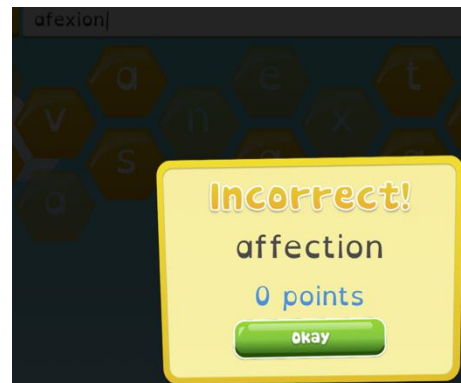

5. On the next screen, you will see which lists have been assigned to you to work on for the current week. You should click on the list at the top. Do NOT click “More Lists”.

6. For practice, the best way to play is on the simple “Play” option. This will earn you points that you can spend on your avatar, and move you higher up the league table. You can also create a “hive” to play against other users currently on the same list as you. The Bonus Game is similar to the game Hangman.

7. You will then be asked to choose from Easy, Medium, Hard or Extreme level – this does not change the words that you will be tested on – it just determines how many extra letters are given as well as the ones that you need. When the game begins, a voice will read out one of your spelling words. You then select the letters to spell the word. When you are happy that you have spelled the word correctly, click the green tick button. You get points for correct spelling AND speed. If you are correct, a “Well done” message appears, and tells you how many points you got. If you are incorrect, it will show you how to spell the word.

8. At the end of the game, you will see a summary of the words that you got right and wrong, along with how many points you have earned. When you click “Okay”, you will be taken back to the “Lists” screen.

9. Play again!
